10.2 SASB Implementation of IEEE Policy 9.17 Ad Hoc [Report](#)
- Metric Implementation Plan ([redline](#), [clean](#))

Gary Hoffman, Ad Hoc Chair, reported.

There was a motion to approve the *IEEE-SA Standards Board Implementation Plan for IEEE Policy 9.17 (Updated 30 June 2016)*. The motion was unanimously approved.

IEEE-SA STANDARDS BOARD IMPLEMENTATION PLAN FOR IEEE POLICY 9.17

Approved by IEEE-SA Standards Board, 15 September 2006 (updated 30 June 2016)

The IEEE-SA Standards Board adheres to IEEE Policy 9.17, which calls for measured and calculated values of quantities to be expressed in metric units in IEEE publications, following the detailed guidance for SI-based metric practice given in the most current version of IEEE/ASTM SI 10 American National Standard for Metric Practice.

Proposed new standards and revised standards submitted for approval should use metric units exclusively in the normative portions of the standard. Metric units shall be the primary unit of measurement where applicable. Inch-pound units may be included in parentheses after the metric units if the Sponsor believes that the audience for the document would benefit from the inclusion of inch-pound units, based on concerns for safety or clarity. Standards Coordinating Committee 14 (SCC14) shall provide guidance to IEEE Staff as they support the committees responsible for generating IEEE standards to help them carry out this implementation plan. IEEE Policy 9.17 recognizes the need for some exceptions. SCC14 shall review requests for individual exceptions and shall report its recommendations to the IEEE-SA Standards Board. Each recommendation from SCC14 to grant an exception shall indicate the period of applicability for such exception.

Exceptions

- Exceptions for trade sizes, such as the AWG wire series and inch-based standards for fasteners. Such data need not be translated into metric terms.
- Also excepted are those cases, such as plugs and sockets, where a mechanical fit to an inch-based product is required.
- This implementation plan does not require metric products to be substituted for inch-based products.

There was a motion to approve the [removal of SCC14 mandatory coordination from Clause 5.4.4 of the *IEEE-SA Standards Board Operations Manual*](#) as described in the ProCom Procedural Change Request Form ([Item 5.2 of the ProCom agenda](#)) recommended for approval by ProCom on 28 June 2016. The motion was unanimously approved.

IEEE-SA Standards Board Operations Manual

5.4.4 Mandatory coordination

The Sponsor shall coordinate via circulations of drafts with the following entities:

~~-- SCC14 (Standards Coordinating Committee on Quantities, Units, and Letter Symbols)~~

-- IEEE Standards Editorial Staff

The Sponsor shall indicate the IEEE Registration Authority Committee (RAC) as a mandatory coordination entity when the draft is submitted for Sponsor ballot if

-- The PAR indicates the possible registration of objects or numbers to be included in or used by the project;

-- It becomes apparent through development of the draft that registration of objects or numbers will be included in or is used by the project;

-- Requested by the RAC.

Comments from these entities shall be given appropriate consideration and response. At the time of project submittal to the IEEE-SA Standards Board for consideration for approval, the Sponsor shall supply the most recent coordination comments and indicate either acceptance or a request for a waiver (see 4.2.3.2).

The ad hoc was disbanded, with thanks for its work.
