IEEE-SA Standards Board Meeting Minutes – December 2014

IEEE-SA Standards Board DRAFT Meeting Minutes
10 December 2014
IEEE Operations Center, Piscataway, New Jersey, USA

Attendees:

Chair:
John Kulick

Vice Chair:
Jon Rosdahl

Past Chair:
Rich Hulett

Secretary:
Konstantinos Karachalios

Members:
Peter Balma
Ted Burse
Clint Chaplin
Stephen Dukes [TAB Rep.]
Gary Hoffman
Mike Janezic
Jeffrey Katz
David Law
Hung Ling
Oleg Logvinov
Ted Olsen
Glenn Parsons
Ron Petersen
Adrian Stephens
Yatin Trivedi
Philip Winston
Don Wright
Yu Yuan

Joe Koepfinger, Member Emeritus
Dick DeBlasio, DOE Liaison

**Members Absent:**
Farooq Bari
Jean-Philippe Faure
Peter Sutherland

**IEEE Staff:**
Melissa Aranzamendez
Christy Bahn
Kathryn Bennett
Catherine Berger
Christina Boyce
Kim Breitfelder
Georedna Brown
Justin Caso
Matthew Ceglia
Sri Chandrasekaran
Chirag Desai
Patricia Dominach
Karen Evangelista
Tricia Gerdon
Patrick Gibbons
Jonathan Goldberg
Lloyd Green
Jodi Haasz
Mary Ellen Hanntz
Yvette Ho Sang
Karen Kenney
Soo Kim
Mike Kipness
Juanita Lewis
Kelly Lorne
Brenda Mancuso
Greg Marchini
Don Messina
Luigi Napoli
Adam Newman
Mary Lynne Nielsen
Moira Patterson
Walter Pienciak
Dave Ringle, Recording Secretary
Rudi Schubert
Sam Sciacca
Alpesh Shah
1  Call to Order

Chair Kulick called meeting to order at 9:03 a.m. Chair Kulick welcomed all attendees to the meeting. There was a round of introductions by all present.

2  Agenda
2.1 Approval of 10 December 2014 SASB Meeting Agenda
There was a motion to approve the 10 December 2014 SASB meeting agenda. The motion was approved, as there was no objection to unanimous consent.

2.2 Consent Agenda
2.2.1 Approval of 20-21 August 2014 SASB Meeting Minutes

2.2.2 AudCom Recommendations

Accepted (standards work authorized):

- EMB/11073 Engineering in Medicine and Biology Society/IEEE 11073 Standards Committee
- MTT/SCC Microwave Theory and Techniques Society/Standards Coordinating Committee (Conditional, with minor editorial changes)
- SASB/SCC42 SASB Standards Coordinating Committee 42/Transportation

Visibly Under Development (standards work authorized):

- NTC/SC Nanotechnology Council/Standards Committee
- SASB/SCC14 SASB Standards Coordinating Committee 14/Quantities, Units, and Letter Symbols

2.2.3 ICCom Recommendations

Revised Industry Connections Activity

Revised ICAID: IC12-003 Intercloud Testbed
https://ieee-sa.centraldesktop.com/p/eAAAAAAAEE-iUAAAAACFcrBq
Recommendation: APPROVE

P&P Baselines and Checklists:

P&P Baseline – Entity:
https://ieee-sa.centraldesktop.com/p/eAAAAAAAADuB0AAAAACjyKmU

P&P Baseline – Individual:
https://ieee-sa.centraldesktop.com/p/eAAAAAAAADuBmAAAAAFIm7sq

P&P Checklist – Entity:
https://ieee-sa.centraldesktop.com/p/eAAAAAAAADuBIAAAAAAGMX2kA

P&P Checklist – Individual:
https://ieee-sa.centraldesktop.com/p/eAAAAAAAADuBaAAAAAEck5Ls
**Recommendation: Approve**

**New Activities** are required to use the baseline P&Ps, with modifications allowed by the baseline. Don’t allow Activities to follow the P&Ps of the Sponsoring Committee unless the Sponsor P&Ps specifically call out IC activities.

**Activities expected to terminate by Q2 2015** follow their current P&Ps.

**Activities expected to continue beyond Q2 2015** switch to the new baseline P&Ps. Consider exceptions for activities with sound P&Ps and where switching would be disruptive, e.g., ICSG.

**Recommendation: Approve**

2.2.4  NesCom Recommendations

**Withdrawal Requests**

IEEE Engineering in Medicine and Biology Society/IEEE 11073TM Standards Committee

**P11073-10201**
Standard for Health Informatics – Point-of-Care Medical Device Communication – Domain Information Model

*Recommendation: Approve PAR withdrawal*

**P11073-10413**
Standard for Health Informatics – Personal Health Device Communication – Device Specialization – Respiration Rate Monitor

*Recommendation: Approve PAR withdrawal*

**P11073-10417a**
Health Informatics – Personal Health Device Communication Part 10417: Device Specialization – Glucose Meter Amendment 1

*Recommendation: Approve PAR withdrawal*

IEEE Industry Applications Society/Technical Books Coordinating Committee

**P3005.3**
Recommended Practice for the Application of Stored-Energy Systems for Use in Emergency and Stand-By Power Systems

*Recommendation: Approve PAR withdrawal*

IEEE Power and Energy Society/Transformers

**PC57.13-2008/Cor 1**
Standard Requirements for Instrument Transformers – Corrigendum 1: Figure 3 Correction
Recommendation: Approve PAR withdrawal

PC57.121a
Guide for Acceptance and Maintenance of Less Flammable Hydrocarbon Insulating Liquid in Transformers: Amendment a
Recommendation: Approve PAR withdrawal

PC57.136
Guide for Sound Level Abatement and Determination for Liquid-Immersed Power Transformers and Shunt Reactors Rated over 500 kVA
Recommendation: Approve PAR withdrawal

IEEE-SASB Coordinating Committees/SCC31 – Automatic Meter Reading and Energy Management

P1704
Standard for Utility Industry End Device Communications Module
Recommendation: Approve PAR withdrawal

PARs to be Administratively Withdrawn

P1817 (C/MSC)
Standard for Consumer-Ownable Digital Personal Property
(New PAR)

P1828 (C/S2ESC)
Standard for Systems with Virtual Components
(New PAR)

P1680.5 (C/SAB)
Standard for Environmental Assessment of Mobile Devices
(New PAR)

P1149.1.1 (C/TT)
Standard for Test Access Port Interface for Connection to Test Data Registers
(New PAR)

P1820 (DEI/SC)
Guide on the Selection of Transmission and Distribution Insulators with Respect to Cold Weather Conditions
(New PAR)

P1451.5-2007/Cor 1 (IM/ST)
IEEE Standard for a Smart Transducer Interface for Sensors and Actuator – Wireless Communication Protocols and Transducer Electronic Data Sheet (TEDS) Formats – Corrigendum 1
(New PAR)

P1289 (PE/NPE)
Guide for the Application of Human Factors Engineering in the Design of Computer-Based Monitoring and Control Displays for Nuclear Power Generating Stations and Other Nuclear Facilities
(Revision PAR)

PC62.62a (PE/SPDLV)
(New PAR)

PC37.2a (PE/SUB)
IEEE Standard Electrical Power System Device Function Numbers, Acronyms, and Contact Designations: Amendment to Device 7 Definition and to Device 16 Suffix Letter Usage, Revision of One and Addition of New Acronyms
(New PAR)

P519.1 (PE/T&D)
Guide for Applying Harmonic Limits on Power Systems
(New PAR)

Modified PARs

IEEE Industry Applications Society/Technical Books Coordinating Committee

P3005.4
Recommended Practice for Design and Operational Considerations for Improving the Reliability of Emergency and Stand-By Power Systems
Recommendation: Approve modified PAR

IEEE Nanotechnology Council/Standards Committee

P62659
Standard for Large Scale Manufacturing of Nanoelectronics
Recommendation: Approve modified PAR

IEEE Power and Energy Society/Substations

P1402
Guide for Physical Security of Electric Power Substations
**Recommendation: Approve modified PAR**

IEEE Power and Energy Society/Transformers

**P60076-16**
Power Transformers – Part 16: Transformers for Wind Turbine Application  
*Recommendation: Approve modified PAR*

**PC57.12.59**
Guide for Dry-Type Transformer Through-Fault Current Duration  
*Recommendation: Approve modified PAR*

**PC57.153**
Guide for Paralleling Regulating Transformers  
*Recommendation: Approve modified PAR*

**PC57.157**
Conducting Functional Life Tests on Switch Contacts Used in Insulating Liquid Filled Transformers  
*Recommendation: Approve modified PAR*

IEEE Reliability Society/IEEE Reliability

**P61014**
Standard for Programmes for Reliability Growth  
*Recommendation: Approve modified PAR*

IEEE-SASB Coordinating Committees/SCC39 – International Committee on Electromagnetic Safety

**P62704-3**
Determining the Peak Spatial-Average Specific Absorption Rate (SAR) in the Human Body from Wireless Communications Devices, 30 MHz – 6 GHz Part 3: Specific Requirements for Using the Finite Difference Time Domain (FDTD) Method for SAR Calculations of Mobile Phones  
*Recommendation: Approve modified PAR*

Extension Requests

IEEE Computer Society/Information Assurance

**P1667**
Standard for Discovery, Authentication, and Authorization in Host Attachments of Storage Devices  
*Recommendation: Approve request for an extension until December 2015*
IEEE Computer Society/Learning Technology

**P1484.13.6**
Recommended Practice for Learning Technology – Open Archives Initiative Object Reuse and Exchange Abstract Model (OAI-ORE) – Mapping to the Conceptual Model for Resource Aggregation

**Recommendation: Approve request for an extension until December 2015**

IEEE Computer Society/Software & Systems Engineering Standards Committee

**P1062**
Recommended Practice for Software Acquisition

**Recommendation: Approve request for an extension until December 2015**

IEEE Computer Society/Simulation Interoperability Stds Organization/Std Activities Committee

**P1278.2**
Standard for Distributed Interactive Simulation (DIS) – Communication Services and Profiles

**Recommendation: Approve request for an extension until December 2015**

IEEE Computer Society/Test Technology

**P1804**
Standard for Fault Accounting and Coverage Reporting to Digital Modules (FACR)

**Recommendation: Approve request for an extension until December 2015**

IEEE Engineering in Medicine and Biology Society/IEEE 11073TM Standards Committee

**P11073-10101**

**Recommendation: Approve request for an extension until December 2016**

**P11073-10419**
Standard for Health Informatics – Personal Health Device Communication – Device Specialization – Insulin Pump

**Recommendation: Approve request for an extension until December 2015**

**P11073-20101**

**Recommendation: Approve request for an extension until December 2016**
IEEE Industry Applications Society/Petroleum & Chemical Industry

**P45.3**
Recommended Practice for Shipboard Electrical Installations – Systems Engineering
*Recommendation: Approve request for an extension until December 2015*

**P45.4**
Recommended Practice for Electrical Installations on Shipboard – Marine Sectors and Mission Systems
*Recommendation: Defer until January 2015 Continuous Process teleconference*

**P45.6**
Recommended Practice for Electrical Installations on Shipboard – Electrical Testing
*Recommendation: Approve request for an extension until December 2016*

**P1242**
Guide for Specifying and Selecting Power, Control, and Special-Purpose Cable for Petroleum and Chemical Plants
*Recommendation: Approve request for an extension until December 2016*

**P60079-30-1**
Explosive Atmospheres – Part 30-1: Electrical Resistance Trace Heating – General and Testing Requirements
*Recommendation: Approve request for an extension until December 2016*

**P60079-30-2**
*Recommendation: Approve request for an extension until December 2016*

IEEE Industry Applications Society/Technical Books Coordinating Committee

**P3002.2**
Recommended Practice for Conducting Load-Flow Studies of Industrial and Commercial Power Systems
*Recommendation: Approve request for an extension until December 2015*

**P3002.3**
Recommended Practice for Conducting Short-Circuit Studies of Industrial and Commercial Power Systems
*Recommendation: Approve request for an extension until December 2015*

**P3002.7**
Recommended Practice for Conducting Motor-Starting Studies in Industrial and Commercial Power Systems

**Recommendation: Approve request for an extension until December 2015**

P3002.8
Recommended Practice for Conducting Harmonic-Analysis Studies of Industrial and Commercial Power Systems

**Recommendation: Approve request for an extension until December 2015**

P3002.9
Recommended Practice for Conducting Switching-Transient Studies of Industrial and Commercial Power Systems

**Recommendation: Disapprove request for an extension**

P3003.1
Recommended Practice for the System Grounding of Industrial and Commercial Power Systems

**Recommendation: Approve request for an extension until December 2016**

P3004.3
Recommended Practice for the Application of Low-Voltage Fuses in Industrial and Commercial Power Systems

**Recommendation: Approve request for an extension until December 2016**

P3004.8
Recommended Practice for Motor Protection in Industrial and Commercial Power Systems

**Recommendation: Approve request for an extension until December 2016**

P3004.10
Recommended Practice for Generator Protection in Industrial and Commercial Power Systems

**Recommendation: Approve request for an extension until December 2016**

P3004.11
Recommended Practice for Bus and Switchgear Protection in Industrial and Commercial Power Systems

**Recommendation: Approve request for an extension until December 2016**

P3005.4
Recommended Practice for Improving the Reliability of Emergency and Stand-By Power Systems

**Recommendation: Defer until January 2015 Continuous Process teleconference**

P3005.7
Recommended Practice for the Application of Metering for Energy Management of Industrial and Commercial Power Systems

**Recommendation: Defer until January 2015 Continuous Process teleconference**

P3006.8
Recommended Practice for Analyzing Reliability Data for Equipment Used in Industrial and Commercial Power Systems

**Recommendation: Approve request for an extension until December 2016**

IEEE Instrumentation and Measurement Society/TC4 – High Frequency Measurement

P378
Recommended Practice for Scattering Parameter Measurements and Uncertainty Analysis Using Network Analyzers

**Recommendation: Approve request for an extension until December 2016**

IEEE Instrumentation and Measurement Society/TC9 – Sensor Technology

P1451.4a

**Recommendation: Approve request for an extension until December 2016**

IEEE Power and Energy Society/Energy Development & Power Generation

P810
Standard for Hydraulic Turbine and Generator Shaft Couplings and Shaft Runout Tolerances

**Recommendation: Approve request for an extension until December 2015**

IEEE Power and Energy Society/Electric Machinery

P112
Standard Test Procedure for Polyphase Induction Motors and Generators

**Recommendation: Approve request for an extension until December 2015**

P117

**Recommendation: Approve request for an extension until December 2015**

IEEE Power and Energy Society/Insulated Conductors

P400.4
Guide for Field-Testing of Shielded Power Cable Systems Rated 5 kV and Above with Damped Alternating Current Voltage (DAC)

**Recommendation:** Approve request for an extension until December 2016

**P442**

Guide for Soil Thermal Resistivity Measurement

**Recommendation:** Approve request for an extension until December 2016

IEEE Power and Energy Society/Nuclear Power Engineering

**P1290**

**Recommendation:** Approve request for an extension until December 2015

IEEE Power and Energy Society/Power System Relaying

**PC37.241**

Guide for Application of Optical Instrument Transformers for Protective Relaying

**Recommendation:** Approve request for an extension until December 2016

**PC37.243**

**Recommendation:** Approve request for an extension until December 2016

IEEE Power and Energy Society/Surge Protective Devices/High Voltage

**PC62.82.2**

Guide for the Application of Insulation Coordination

**Recommendation:** Approve request for an extension until December 2016

IEEE Power and Energy Society/Surge Protective Devices/Low Voltage

**PC62.34**

Standard for Test Methods and Performance of Low-Voltage (1000 V rms or less) Surge Protective Devices Used on Secondary Distribution Systems (Between the Transformer Low-Voltage Terminals and the Line Side of the Service Entrance Equipment)

**Recommendation:** Approve request for an extension until December 2016

**PC62.44**

Guide for the Application of Low-Voltage (1000 Volts rms or Less) Surge Protective Devices Used on Secondary Distribution Systems (Between the Transformer Low-Voltage Terminals and the Line Side of the Service Entrance Panel)

**Recommendation:** Approve request for an extension until December 2016
IEEE Power and Energy Society/Substations

**P1267**
Guide for Development of Specification for Turnkey Substation Projects

*Recommendation: Approve request for an extension until December 2016*

**P1402**
Standard for Physical Security of Electric Power Substations

*Recommendation: Approve request for an extension until December 2017*

**P1527**
Recommended Practice for the Design of Buswork Located in Seismically Active Areas

*Recommendation: Approve request for an extension until December 2016*

**P1821**
Guide for Usage of Design Tools for Power Electronic Building Blocks (PEBB) and PEBB Based Systems

*Recommendation: Defer until January 2015 Continuous Process teleconference*

**PC37.122.4**
Application and User Guide for Gas-Insulated Transmission Lines (GIL), Rated 72.5 kV and Above

*Recommendation: Approve request for an extension until December 2015*

**PC37.123**
Guide for Specifications for High Voltage Gas-Insulated Substations Rated 52 kV and Above

*Recommendation: Approve request for an extension until December 2015*

IEEE Power and Energy Society/Switchgear

**P62271-37-013**
High-Voltage Switchgear and Controlgear – Part 37-013: Alternating-Current Generator Circuit-Breakers

*Recommendation: Approve request for an extension until December 2015*

**PC37.20.2**
Standard for Metal-Clad Switchgear

*Recommendation: Approve request for an extension until December 2015*

**PC37.66**
Standard Requirements for Capacitor Switches for AC Systems (1 kV to 38 kV)

*Recommendation: Approve request for an extension until December 2016*
PC37.100.2
Standard for Common Requirements for Testing of AC Capacitance Current Switching Devices Over 1000 V
Recommendation: Approve request for an extension until December 2016

IEEE Power and Energy Society/Transmission and Distribution

P430
Standard Procedures for the Measurement of Radio Noise from Overhead Power Lines and Substations
Recommendation: Approve request for an extension until December 2016

P1048
Guide for Protective Grounding of Power Lines
Recommendation: Defer until January 2015 Continuous Process teleconference

P1829
Guide for Conducting Corona Tests on Hardware for Overhead Transmission Lines and Substations
Recommendation: Approve request for an extension until December 2016

IEEE Power and Energy Society/Transformers

PC57.13
Standard Requirements for Instrument Transformers
Recommendation: Approve request for an extension until December 2016

PC57.13.7
Standard for Current Transformers with a Maximum mA Secondary Current of 250 mA
Recommendation: Approve request for an extension until December 2016 – note: additional year per NesCom

PC57.104
Guide for the Interpretation of Gases Generated in Oil-Immersed Transformers
Recommendation: Approve request for an extension until December 2017

PC57.153
Guide for Paralleling Regulating Transformers
Recommendation: Approve request for an extension until December 2015

IEEE Power Electronics Society/Standards Committee

P1789
Recommended Practices of Modulating Current in High Brightness LEDs for Mitigating Health Risks to Viewers
Recommendation: Approve request for an extension until December 2015

IEEE-SASB Coordinating Committees/SCC20 – Test and Diagnosis for Electronic Systems

P1671.5
Standard for Automatic Test Markup Language (ATML) Test Adaptor Description
Recommendation: Approve request for an extension until December 2015

P1671.6
Standard for Automatic Test Markup Language (ATML) Test Station Description
Recommendation: Approve request for an extension until December 2015

IEEE-SASB Coordinating Committees/SCC21 – Fuel Cells, Photovoltaics, Dispersed Generation, and Energy Storage

P1547.8
Recommended Practice for Establishing Methods and Procedures that Provide Supplemental Support for Implementation Strategies for Expanded Use of IEEE Standard 1547
Recommendation: Approve request for an extension until December 2015

P2030.2
Guide for the Interoperability of Energy Storage Systems Integrated with the Electric Power Infrastructure
Recommendation: Approve request for an extension until December 2015

IEEE-SASB Coordinating Committees/SCC39 – International Committee on Electromagnetic Safety

PC95.1
Standard for Safety Levels with Respect to Human Exposure to Electric, Magnetic and Electromagnetic Fields, 0 Hz to 300 GHz
Recommendation: Approve request for an extension until December 2016

NEW PARs

IEEE Computer Society/Design Automation

P1800.2
Recommendation: Approve new PAR until December 2018

IEEE Computer Society/LAN/MAN Standards Committee

P802.1AS-2011/Cor 2
Standard for Local and Metropolitan Area Networks – Timing and Synchronization for Time-Sensitive Applications in Bridged Local Area Networks – Corrigendum 2: Technical and Editorial Corrections

**Recommendation: Approve new PAR until December 2018**

**P802.3bv**
Standard for Ethernet Amendment: Physical Layer Specifications and Management Parameters for 1000 Mb/s Operation over Plastic Optical Fiber

**Recommendation: Approve new PAR until December 2018**

**P802.3by**
Standard for Ethernet Amendment: Media Access Control Parameters, Physical Layers and Management Parameters for 25 Gb/s Operation

**Recommendation: Approve new PAR until December 2018**

IEEE Computer Society/Microprocessor Standards Committee

**P1363.3-2013/Cor 1**
Standard for Identity-Based Cryptographic Techniques Using Pairings – Corrigendum 1: Corrections to Citations

**Recommendation: Approve new PAR until December 2018**

IEEE Computer Society/Software & Systems Engineering Standards Committee

**P15026-3**
Adoption of Systems and Software Engineering – Systems and Software Assurance – Part 3: Systems Integrity Levels

**Recommendation: Approve new PAR until December 2018**

IEEE Computer Society/Standards Activities Board

**P1680.6**
Standard for Environmental Assessment of Complex Set Top Boxes

**Recommendation: Approve new PAR until December 2018**

**P1857.7**
Standard for Adaptive Streaming

**Recommendation: Approve new PAR until December 2018**

IEEE Communications Society/Standards Development Board

**P1904.3**
Standard for Radio over Ethernet Encapsulations and Mappings

**Recommendation: Approve new PAR until December 2018**

**P1911.1**
HDBaseT Specification Version 1.1.0
Recommendation: Approve new PAR until December 2018

P1911.2
HDBaseT Specification Version 2.0
Recommendation: Approve new PAR until December 2018

P1911.3
Standard for HDBaseT 5Play
Recommendation: Approve new PAR until December 2018

IEEE Engineering in Medicine and Biology Society/IEEE 11073 Standards Committee

P11073-10702
Standard for Domain Information & Service Model for Service-Oriented Point-of-Care Medical Device Communication
Recommendation: Approve new PAR until December 2018

P11073-20601-2014/Cor 1
Health Informatics - Personal Health Device Communication – Part 20601: Application Profile- Optimized Exchange Protocol – Corrigendum 1
Recommendation: Approve new PAR until December 2018

P11073-20701
Standard for Service-Oriented Medical Device Exchange Architecture & Protocol Binding
Recommendation: Approve new PAR until December 2018

P11073-20702
Standard for Medical Devices Communication Profile for Web Services
Recommendation: Approve new PAR until December 2018

IEEE Engineering in Medicine and Biology Society/Standards Committee

P1847
Recommended Practice for Common Framework of Location-Based Services (LBS) for Healthcare
Recommendation: Approve new PAR until December 2018

IEEE-SASB Coordinating Committees/SCC20 – Test and Diagnosis for Electronic Systems

P1514
Recommended Practice for the Design and Integration of Fixtures Applied to Generic Test Interfaces of Automatic Test Systems
Recommendation: Approve new PAR until December 2018
IEEE Vehicular Technology Society/Rail Transportation Standards Committee

**P1653.5**
Recommended Practice for Controlled Rectifiers for Traction Power Substation Applications
*Recommendation: Defer until January 2015 Continuous Process teleconference*

PARs for the Revision of Standards

IEEE Computer Society/LAN/MAN Standards Committee

**P802.1AB**
Standard for Local and Metropolitan Area Networks – Station and Media Access Control Connectivity Discovery
*Recommendation: Approve PAR for the revision of a standard until December 2018*

**P802.15.7**
Standard for Short-Range Wireless Optical Communication
*Recommendation: Approve PAR for the revision of a standard until December 2018*

IEEE Engineering in Medicine and Biology Society/IEEE 11073 Standards Committee

**P11073-10417**
Health Informatics – Personal Health Device Communication Part 10417: Device Specialization – Glucose Meter
*Recommendation: Approve PAR for the revision of a standard until December 2018*

IEEE Power and Energy Society/Insulated Conductors

**P1202**
Standard for Testing Flame-Propagation and Smoke Generation of Cable or Splices/Connectors
*Recommendation: Approve PAR for the revision of a standard until December 2018*

IEEE Power and Energy Society/Substations

**P1613.1**
Standard Environmental and Electromagnetic Compatibility (EMC) Testing Requirements for Intelligent Electronic Devices (IEDs) Installed in Transmission and Distribution Facilities
IEEE-SA Standards Board Meeting Minutes – December 2014

**Recommendation:** Conditionally approve PAR for the revision of a standard until December 2018; contingent upon staff making one minor edit to the PAR to spell out IED in the scope

**PC37.2**
Standard Electrical Power System Device Function Numbers, Acronyms, and Contact Designations

**Recommendation:** Approve PAR for the revision of a standard until December 2018

IEEE Power and Energy Society/Switchgear

**PC37.12**
Guide for Specifications of High-Voltage Circuit Breakers (Over 1000 Volts)

**Recommendation:** Approve PAR for the revision of a standard until December 2018

IEEE Power and Energy Society/Switchgear

**PC37.13.1**
Standard for Definite-Purpose Switching Devices for Use in Metal-Enclosed Low-Voltage (1000 Vac and Below) Power Circuit Breaker Switchgear

**Recommendation:** Approve PAR for the revision of a standard until December 2018

IEEE Power and Energy Society/Transformers

**PC57.129**
Converter Transformers for HVDC Applications

**Recommendation:** Approve PAR for the revision of a standard until December 2018

IEEE-SASB Coordinating Committees/SCC21 – Fuel Cells, Photovoltaics, Dispersed Generation, and Energy Storage

**P1547.1**
Standard Conformance Test Procedures for Equipment Interconnecting Distributed Energy Resources with Electric Power Systems and Associated Interfaces

**Recommendation:** Approve PAR for the revision of a standard until December 2018

IEEE Vehicular Technology Society/Intelligent Transportation Systems

**P1609.2**
Standard for Wireless Access in Vehicular Environments – Security Services for Applications and Management Messages
Recommendation: Approve PAR for the revision of a standard until December 2018

P1609.3
Standard for Wireless Access in Vehicular Environments (WAVE) – Networking Services
Recommendation: Approve PAR for the revision of a standard until December 2018

2.2.5 RevCom Recommendations

NEW

P802.1Xbx/Draft 1.6 (C/LM) Standard for Local and Metropolitan Area Networks – Port-Based Network Access Control Amendment 1: MAC Security Key Agreement Protocol (MKA) Extensions

Recommendation: APPROVE

P1609.3-2010/Cor 2/Draft 4 (VT/ITS) Standard for Wireless Access in Vehicular Environments (WAVE) – Networking Services – Corrigendum 2: Correct Identified Errors

Recommendation: APPROVE

P1609.4-2010/Cor 1/Draft 4 (VT/ITS) Standard for Wireless Access in Vehicular Environments (WAVE) – Multi-Channel Operation – Corrigendum 1: Correct Identified Errors

Recommendation: APPROVE

P1642/Draft 10 (EMC/SDCom) Recommended Practice for Protecting Public Accessible Computer Systems from Intentional EMI

Recommendation: Conditional approval
There was a motion to conditionally approve P1642 based on the Sponsor providing in writing to those balloters who did not receive disposition detail for the revised comments.

P1735/Draft 7 (C/DA) Recommended Practice for Encryption and Management of Electronic Design Intellectual Property (IP)

Recommendation: APPROVE

P1812/Draft D5 (PE/EM) Trial-Use Guide for Testing Permanent Magnet Machines

Recommendation: APPROVE

Recommendation: APPROVE

P1839/Draft 2 (PE/T&D) Standard for Below-Grade Corrosion Control of Transmission, Distribution, and Substation Structures by Coating Repair Systems

Recommendation: APPROVE

P1871.1/Draft 5 (SASB/SCC20) Recommended Practice for Using IEEE 1671.2 Instrument Description Templates for Describing Synthetic Instrumentation for Classes of Instruments Such as Waveform Generators, Digitizers, External Oscillators, and Up & Down Converters

Recommendation: APPROVE

P1895/Draft 2 (PE/T&D) Standard for Below-Grade Inspection and Assessment of Corrosion on Steel Transmission, Distribution, and Substation Structures

Recommendation: APPROVE

P1905.1a/Draft 2 (COM/PLC) Standard for a Convergent Digital Home Network for Heterogeneous Technologies Amendment 1: Support of New MAC/PHYs and Enhancements

Recommendation: Conditional approval

There was a motion to conditionally approve P1905.1a, pending the resolution of RAC comments where the outcome does not result in a substantive change being made in the P1905.1a standard.

P3006.5/Draft D2 (IAS/TBCC) Recommended Practice for the Use of Probability Methods for Conducting a Reliability Analysis of Industrial and Commercial Power Systems

Recommendation: APPROVE

P15288.1/Draft P15288.1/D4.1 (C/S2ESC) Standard for Application of Systems Engineering on Defense Programs

Recommendation: APPROVE
P15288.2/Draft P15288.2/D5.2 (C/S2ESC) Standard for Technical Reviews and Audits on Defense Programs

Recommendation: APPROVE

Recommendation: APPROVE

REVISION

P802.1AX/Draft D4.54 (C/LM) Standard for Local and Metropolitan Area Networks – Link Aggregation

Recommendation: APPROVE

Recommendation: Conditional approval
There was a motion to conditionally approve P1566 based on the Sponsor providing in writing to those balloters who did not receive disposition detail for the revised comments.

PC37.11/Draft 6.6 (PE/SWG) Standard Requirements for Electrical Control for AC High-Voltage (>1000V) Circuit Breakers

Recommendation: APPROVE

PC37.74/Draft 12 (PE/SWG) Standard Requirements for Subsurface, Vault, and Padmounted Load-Interrupter Switchgear and Fused Load-Interrupter Switchgear for Alternating Current Systems up to 38 kV

Recommendation: APPROVE

Recommendation: APPROVE

Recommendation: APPROVE

Recommendation: APPROVE

3 Legal Update [Executive Session]

The SASB entered Executive Session at 9:25 a.m.

Attendees: SASB Members, BOG Members, Legal Counsels to IEEE, IEEE-SA Senior staff, IEEE-SA Governance staff

The SASB ended Executive Session at 9:55 a.m.

Report Out:

a) A report was received from legal counsel.
b) The vote in Item 9.2 will occur via paper ballot.

There was a motion to take item 9.2 immediately prior to item 5.4. The motion was approved [Vote: Yes=19; Abstain=1 (Parsons)].

4 IEEE-SA Managing Director’s Report

Konstantinos Karachalios, IEEE-SA Managing Director, reported.

5 SASB Standing Committee Reports

5.1 Audit Committee (AudCom)

Michael Janezic, Acting AudCom Chair, reported.

Extension Request for Sponsor P&Ps Expiring in December 2014: Sasb/SCC22, Standards Association Standards Board Standards Coordinating Committee 22/Power Quality

There was a motion (from AudCom) to approve the extension request for Sasb/SCC22/Power Quality, with a deadline to submit the P&Ps for the next AudCom meeting. The motion was unanimously approved.

5.2 Industry Connections Committee (ICCom)

Oleg Logvinov, ICCom Chair, reported.

There was a motion (from ICCom) to recommend the approval of the two requests for one year waivers for corporate membership. The two groups are IC12-003 Intercloud
Testbed and IC13-004 Ethernet & IP @ Automotive Technology Day. The recommendation is to be sent to the BOG for approval.

A Substitute motion was made to recommend to the BOG to suspend the corporate membership requirement for the two groups (IC12-003 Intercloud Testbed and IC13-004 Ethernet & IP @ Automotive Technology Day) through calendar year 2015. The motion was approved [Vote: Yes=18, No=1 (Parsons), Abstain=1 (Chaplin)].

**Action item:** Dave Ringle to forward the motion to the BOG.

5.3 New Standards Committee (NesCom)

Phil Winston, NesCom Chair, reported.

5.3.1 P1904.3 [Time-specific: 2:00 p.m.]

Phil Winston, NesCom Chair, initiated discussion.

Attendees via phone:
Alex Gelman, Glen Kramer, and Mehmet Ulema

The recommendation from NesCom:

IEEE Communications Society/Standards Development Board

**P1904.3**

Standard for Radio over Ethernet Encapsulations and Mappings

*NesCom Recommendation: Approve new PAR until December 2018*

After a fair amount of discussion, a motion was made to Call the Question. That motion was approved [Vote: Yes=16; No=4].

The motion **(approving the NesCom recommendation to Approve the new PAR until December 2018)** was then approved [Vote: Yes=13; No=7].

5.4 Patent Committee (PatCom)

David Law, PatCom Chair reported.

5.5 Procedures Committee (ProCom)

Jon Rosdahl, ProCom Chair, reported.

The following P&P change (noted below in **blue highlight**) was recommended by ProCom for SASB approval consideration:

**IEEE-SA Standards Board Operations Manual**

**1.2 Types of IEEE standards**

IEEE standards include but are not limited to:

— Lists of terms, definitions, or symbols, applicable to any field of science or technology within the scope of the IEEE.
— Expositions of scientific methods of measurement or tests of the parameters or performance of any device, apparatus, system, or phenomenon associated with the art, science, or technology of any field within the scope of the IEEE.
— Characteristics, performance, and safety requirements associated with devices, equipment, and systems with engineering installations.
— Recommendations reflecting current state-of-the-art in the application of engineering principles to any field of technology within the scope of the IEEE.

IEEE standards are classified as:

— **Standards**: documents with mandatory requirements.
— **Recommended practices**: documents in which procedures and positions preferred by the IEEE are presented.
— **Guides**: documents in which alternative approaches to good practice are suggested but no clear-cut recommendations are made.
— **Trial-Use documents**: publications in effect for not more than two-three years (see 5.7). They can be any of the categories of standards publications listed above. (See 5.7.)

The IEEE standards development process may result in one or more of the following documents:

— **New**: A document that does not replace or modify another standard.
— **Revision**: A document that updates and replaces (i.e., supersedes) an existing IEEE standard in its entirety.
— **Amendment**: A document that adds to, removes from, or alters material in a portion of an existing IEEE standard and may make editorial or technical corrections to that standard.

NOTE – An amendment to a standard may be prepared to maintain the state-of-the-art within the standard due to advancing technology or techniques. An amendment facilitates the timely change of an existing IEEE standard prior to its complete revision.

— **Corrigendum**: A document that only corrects editorial errors, technical errors, or ambiguities in an existing IEEE standard. A corrigendum does not introduce new material.

NOTE – A typical corrigendum may contain:

— Corrections to equations, tables, or figures, or their associated numbering or citations in the text
— Corrections to technically incorrect sentences or paragraphs

— **Erratum**: A document that contains only grammatical corrections to, or corrections of errors introduced during the publishing process of, an existing IEEE standard. An erratum is based on the comparison of the final balloted version of the standard as compared to the published version.

IEEE Standards Project Editors can assist Sponsors in determining whether an amendment or revision is appropriate.

IEEE Standards may be in one of three states of activity:

— **Developing**: Standards projects that have not yet been approved as standards.
— **Active**: Approved standards that have not been transferred to inactive status.
— **Inactive**: Standards that are no longer being reviewed or assessed for accuracy, relevance to current practices, or further applications; these standards are removed from active status (i.e., these standards are transferred from active to inactive status). (See 9.2).

### 5.4.3.5 Completion of the standards balloting process and submittal to RevCom

A minimum of 75% of those voting Approve or Do Not Approve (Negative with comment) must approve the draft in order to submit the ballot result to the IEEE-SA Standards Board. In the event that 30% or more of the returned ballots are Abstentions, the standards balloting process shall be considered invalid.

In the event that a 75% return cannot be obtained, the standards balloting process is considered to have failed and further disposition of the proposed standard shall be the responsibility of the Sponsor.

Once all required recirculations have been completed and 75% approval has been achieved, the IEEE requirements for consensus have been met. Efforts to resolve Do Not Approve votes may continue for a brief period; however, if such resolution is not possible in a timely manner, the Sponsor should forward the submittal to RevCom because the IEEE has an obligation to the majority to review and publish the proposed standard quickly.

Copies of all unresolved Do Not Approve votes, together with the reasons given by the Do Not Approve voters and the responses by the Sponsor, shall be included with the ballot results submitted to RevCom.

The Sponsor shall, if not included in a recirculation package, provide to the Do Not Approve voter and to RevCom an explanation why any comments associated with a Do Not Approve vote were not required to be recirculated. In order for a Do Not Approve vote to be changed to an Approve or Abstain vote, the Sponsor shall obtain and provide to RevCom written confirmation from each voter (by letter, fax, or electronic mail) that indicates concurrence with any change of his or her vote. Any Do Not Approve vote with comment that RevCom is asked to consider as a Do Not Approve (Negative without comment) shall be explained to RevCom.
Proposed standards receiving a significant number of unresolved *Do Not Approve* votes should be considered by the Sponsor for trial-use (see 5.7).

5.7 Trial-Use standards

A Trial-Use standard may be appropriate for the following situations:

a) To bring together concepts for cutting edge technologies that are so new that standardization concepts need to be developed as the technology progresses.

b) To solicit input from a broader community prior to consideration of the development of a full-use standard.

c) As an alternative for a proposed standard that receives a significant number of *Do Not Approve* votes that cannot be resolved.

Trial-Use standards are effective for not more than **two-three years** and cannot be amended; it is allowable to have corrigenda against a Trial-Use standard from the date of publication. In the absence of comments received in the trial period, the document is subject to adoption as a full-status standard by the IEEE-SA Standards Board upon recommendation of the Sponsor. Trial-Use standards are prepared through the normal standards process and require a PAR indicating trial-use, Sponsor balloting, ballot resolution, and IEEE-SA Standards Board approval. During the trial-use period, users and those interested in the document may submit comments. The front matter of each approved Trial-Use standards shall contain a published scheduled cutoff date for receipt of comments and shall state the expiration date for the Trial-Use document (dates shall be calendar dates, i.e., dd mmm yyyy) for further revision and approval action. The comment cutoff date shall be at least six-12 months before the end of expiration date for the Trial-Use period for the standard. The expiration date for the Trial-Use standard shall be three years from its publication date. Upon expiration, the Trial-Use standard shall be transferred to inactive status (i.e., the document will be labeled **Inactive** and reserved for historical reference.)

The approval period for a trial-use standard that is adopted as a full-status standard without change shall be for a total of ten years from the start of the trial-use period. If the trial-use period demonstrates that a trial-use standard has to undergo changes to become a full-status standard, a PAR for revision of an existing standard shall be prepared. The Sponsor shall consider the comments received. If the document is to be converted to a full-use document, a revision project shall be initiated through the submission of a PAR that indicates full-use status. The normal Sponsor balloting and approval processes applicable to all standards shall be followed. Sponsor balloting for the full-use document shall not be conducted until after the comment cutoff date for the Trial-Use document. Once approved, the full-use standard will follow all of the applicable policies and procedures (e.g., ten-year life; can be amended; can be further revised; etc.).

The Sponsor may consider converting a full-use project to a Trial-Use project. To make this conversion, a Modified PAR indicating the change to a Trial-Use project shall be submitted to NesCom. If the Sponsor balloting process has begun, the Sponsor cannot convert the project from full-use to trial-use without terminating the active ballot.

In addition, the Sponsor may consider converting a Trial-Use project to a full-use project. To make this conversion, a Modified PAR indicating the change to a full-use project shall be submitted to NesCom. If the Sponsor balloting process has begun, the Sponsor cannot convert the project from trial-use to full-use without terminating the active ballot.

Trial-Use standards may result from one of the following:

a) At the Standards Development Level. When a draft has been generated that generally
satisfies the standards-developing group (i.e., subcommittee or working group) but needs input from a very broad constituency, such a draft may be processed as an IEEE Trial-Use Standard. For approval, such a draft requires a letter ballot of the Sponsor and approval by the IEEE-SA Standards Board as a trial-use standard.

b) At the Sponsor Level. When a Sponsor is unable to resolve negative ballots to a satisfactory level, or uncertain aspects of the document justify preliminary distribution, it may consider submission of the draft to the IEEE-SA Standards Board as a trial-use standard.

c) At the IEEE-SA Standards Board Level. When the IEEE-SA Standards Board cannot attain a suitable level of approval for a draft submitted for adoption as an IEEE Standard, it may decide to approve it as a trial-use standard.

The SASB unanimously approved the P&P change.

The following P&P change was recommended by ProCom for SASB approval consideration:

**IEEE-SA Standards Board Operations Manual**

6.2 Commercial terms and conditions

6.2.1 IEEE standards

Provisions involving business relations between buyer and seller such as guarantees, warranties, and other commercial terms and conditions shall not be included in an IEEE standard. The appearance that a standard endorses any particular products, services, or companies shall be avoided. Therefore, it generally is not acceptable to include manufacturer lists, service provider lists, or similar material in the text of an IEEE standard. Where a sole source exists for essential equipment, materials, or services necessary to comply with or to determine compliance with the standard, it is permissible to supply the name and address of the source in a footnote as long as the words “or the equivalent” are added to the reference. In connection with standards that relate to the determination of whether products or services conform to one or more standards, the process or criteria for determining conformity can be standardized as long as the description of the process or criteria (a) is limited to technical or engineering concerns and does not include what would otherwise be a commercial term, and (b) does not provide for testing conformance with any commercial terms.

6.2.2 Industry Connections Work Products

Provisions involving business relations between buyer and seller such as guarantees, warranties, and other commercial terms and conditions shall not be included in an IEEE Industry Connections Work Product, except for provisions approved by the IEEE in connection with the sale or license of the IEEE Industry Connections Work Product by the IEEE or by an agent authorized by the IEEE. While an Industry Connections Work Product may contain references to products, services, or companies, an Industry Connections Work Product shall not endorse or appear to endorse any particular products, services, or companies.

The SASB unanimously approved the P&P change.

The following *IEEE-SA Standards Board Operations Manual* interpretation response was recommended by ProCom for SASB approval consideration:
In response to your request for an interpretation of whether a Sponsor is entitled to unfettered access to WG materials can be reasonably inferred from SASB OpMan 5.1.1; ProCom agrees that having unrestricted full access to WG materials solely for the purpose of meeting the requirements of SASB OpMan 5.1.1 is reasonable.

There was a motion to Amend:

In response to your request for an interpretation of whether a Sponsor is entitled to unfettered access to WG materials can be reasonably inferred from SASB OpMan 5.1.1; ProCom agrees that a member of the Sponsor shall having unrestricted full access to its WG materials solely for the purpose of meeting the requirements of SASB OpMan 5.1.1 is reasonable.

The Amendment was approved [Vote: Yes=19; Abstain=1 (Logvinov)].

The new main motion:

In response to your request for an interpretation of whether a Sponsor is entitled to unfettered access to WG materials can be reasonably inferred from SASB OpMan 5.1.1; ProCom agrees that a member of the Sponsor shall have unrestricted full access to its WG materials solely for the purpose of meeting the requirements of SASB OpMan 5.1.1.

After some discussion, a motion was made to Call the Question. That motion was approved [Vote: Yes=18; Abstain=2 (Logvinov, Wright)].

The main motion was approved [Vote: Yes=18; No=2 (Logvinov, Wright)].

The following P&P change was recommended by ProCom for SASB approval consideration:

IEEE-SA Standards Board Operations Manual

8.1.2 Amendments and corrigenda

Amendments and corrigenda are independent projects and are processed with separate PARs and balloted independently in accordance with the requirements of these procedures, including submission to the IEEE-SA Standards Board. A corrigendum may not extend the scope of the existing standard. An amendment may extend the scope of the existing standard, but if the proposed scope of the amendment PAR or the changes made in the draft amendment are found to be excessive by the IEEE-SA Standards Board, the Sponsor shall initiate a revision PAR to replace the amendment PAR.

All PARs for amendments and corrigenda shall include a project scope.

All amendments and corrigenda shall follow the style conventions for indicating changes defined in the IEEE Standards Style Manual.
Sponsor ballots of amendments and corrigenda shall also include access to the approved base standard and any approved amendments and corrigenda in order to provide sufficient information to the ballot group.

Up to three amendments can be approved before the standard shall be revised, unless the base standard has been approved within the past three years. In such a case, multiple amendments may be added until the base standard is three years old. After the three-year period, RevCom shall defer consideration of additional amendments or corrigenda until a revision or a two-year extension request is approved by the IEEE-SA Standards Board.

If, for any extenuating circumstances, an exception to these rules is required, the Sponsor shall take its request for a two-year extension to RevCom. A project plan outlining the rationale for the request, as well as a schedule for the revision, also shall be submitted. RevCom will review the request and make a recommendation to the IEEE-SA Standards Board.

During the two-year extension period, Sponsors can submit additional amendments and corrigenda for approval consideration. However, after this period, RevCom shall defer consideration of additional amendments or corrigenda until a revision is approved by the IEEE-SA Standards Board.

**The SASB unanimously approved the P&P change.**

The following P&P change was recommended by ProCom for SASB approval consideration:

**IEEE-SA Standards Board Operations Manual**

**6.2 Commercial terms and conditions**

Provisions involving business relations between buyer and seller such as guarantees, warranties, and other commercial terms and conditions shall not be included in an IEEE standard. The appearance that a standard endorses any particular products, services, or companies shall be avoided. Therefore, it generally is not acceptable to include manufacturer lists, service provider lists, or similar material in the text of an IEEE standard. Where a sole source exists for essential equipment, materials, or services necessary to comply with or to determine compliance with the standard, it is permissible to supply the name and address of the source in a footnote as long as the words “or the equivalent” are added to the reference. In connection with standards that relate to the determination of whether products or services conform to one or more standards, the process or criteria for determining conformity can be standardized as long as the description of the process or criteria (a) is limited to technical or engineering concerns and does not include what would otherwise be a commercial term, and (b) does not provide for testing conformance with any commercial terms.

**The SASB approved the P&P change [Vote: Yes=19; Abstain=1 (Ling)].**

The following P&P change (noted below in **blue highlight**) was recommended by ProCom for SASB approval consideration:

**IEEE-SA Standards Board Operations Manual**

**5.1.2 Duties of the Sponsor**
5.1.2.1 Mandatory requirements

Supervision of a standards project by the Sponsor includes the following mandatory requirements:

a) Submit a properly completed Project Authorization Request (PAR) for IEEE-SA Standards Board approval within six months of the first decision to initiate the project. Forms and information may be obtained from the NesCom Administrator (see 5.2).

b) After approval of the project, work with the IEEE Standards Department Staff to give notice of the project in appropriate publications and to appropriate entities, for the purpose of soliciting an expression of interest in the work of the sponsoring committee.

c) Ensure that mandatory coordination requirements are accomplished (see 4.2.3.2 and 5.4.4).

d) Organize the technical development work on the standard.

e) Notify persons who have expressed interest in the time and the place of meetings as specified in the P & P of the Sponsor (see 5.1.1).

f) Ensure that all meetings involving standards are open to all interested parties.

g) Conduct the standards ballot and IEEE Public Review in accordance with these procedures (see 5.4).

h) Submit the proposed standard together with the submittal form to the IEEE-SA Standards Board.

i) Submit annually to the IEEE Standards Department an electronic roster of individuals participating on standards projects.

j) Without exception, the Sponsor shall ensure the submission of an annual financial report(s) for the operation of the Sponsor and all of its standards development committees (e.g., working groups, task groups). Those groups operating without treasury are required to submit an annual declaration thereof via the report (see 5.3.6).

k) Monitor standards developing committees for signs of dominance by any single interest category, individual, or organization. If dominance is suspected, the Sponsor shall promptly notify the IEEE-SA Standards Board and shall immediately address the concern with the standards developing committee leadership.

l) If a Working Group (WG) was created for technical development work on a standard, ensure that a written set of WG policies and procedures (P & P) is created and approved by the Sponsor. Such P & P shall not be in conflict with the IEEE-SA Standards Board Operations Manual. Sponsors should note that IEEE-SA Standards Board maintains a baseline WG P & P, and may occasionally request to review a Sponsor's WG P & P for alignment.

5.4.1 Balloting group

The balloting group shall meet the criteria in subclause 5.2.2.3 of the IEEE-SA Standards Board Bylaws. Balloting group members have an obligation to respond during the balloting period; failure to return a ballot may disqualify the balloter from participation in future balloting groups. The balloting group shall provide for the development of consensus by all interests significantly affected by the scope of the standard. This is achieved through a balance of such interests in the balloting group membership. Balance is achieved by not permitting any single interest category to comprise more than one-third of the Sponsor balloting group.

No balloter shall have more than one vote.

Balloters are required to classify their relationship to the balloting group relative to the scope of standards activity (for example, producer, user, and general interest). Where appropriate, additional classifications, such as "testing laboratory" or "academic," may be added by the Sponsor. This decision should be based on the effect the standard may have on participants not already recognized by the primary classifications. Individuals classify themselves based on their technical background, which may be related to their employment, job functions, or experience.
IEEE-SA entity balloters are classified based on their entity interest as it relates to the scope of the standards project (for example, producer, consumer, general interest). No single classification (interest category) is permitted to constitute more than one-third of the balloting group membership. Care shall be taken to ensure that all classes of interest are represented to the extent possible.

It is desirable to have representation of the materially interested and affected parties when reviewing the balance of the balloting group. Sponsors shall ensure balance prior to conducting a Sponsor ballot. Balloting groups of individuals should have at least 10 members to ensure adequate balance.

Interested or affected persons who pay the appropriate fees associated with voting privileges may join the balloting group for a specific standards project. Once the ballot has begun, the balloting group is closed to additional participants. Even if IEEE-SA membership status changes during the balloting period or recirculation period, there shall be no change to the voting status of the balloter with respect to that ballot.

Persons may also purchase the ballot draft for information only. Such persons may submit comments on the draft within the balloting period. However, they may not vote to approve, disapprove, or abstain on the proposed standard, nor are they entitled to receive any material other than the revised draft and responses to their comments.

Comments from persons who are not members of the balloting group shall be given due consideration and an appropriate response.

5.4.3.3 Comments in the ballot

The Sponsor shall consider all comments that are received by the close of the ballot. Comments received after the close of balloting will be provided to the Sponsor. The Sponsor shall acknowledge the receipt of these late comments to the initiator and take such action as the Sponsor deems appropriate.

The Sponsor shall make a reasonable attempt to resolve all Do Not Approve votes that are accompanied by comments. Comments that advocate changes in the proposed standard, whether technical or editorial, may be accepted, revised, or rejected.

Sponsors shall provide evidence of the consideration of each comment via approved IEEE Standards Association balloting tools.

Until the proposed standard has achieved 75% approval, comments can be based on any portion of the proposed standard. Comments not based on the proposed standard may be deemed out-of-scope of the standards balloting process by the Sponsor.

Once the proposed standard has achieved 75% approval, comments in subsequent ballots shall be based only on the changed portions of the balloted proposed standard, portions of the balloted proposed standard affected by the changes, or portions of the balloted proposed standard that are the subject of unresolved comments associated with Do Not Approve votes. If comments are not based on the above criteria, the comments may be deemed out-of-scope of the recirculation. Such comments need not be addressed in the current standards balloting process and may be considered for a future revision of the standard.

Comments addressing grammar, punctuation, and style, whether attached to an Approve or a Do Not Approve vote, may be referred to the publications editor for consideration during preparation...
for publication. It should be borne in mind that proposed standards are professionally edited prior to publication.

Comments received before the close of ballot from participants who are not in the Sponsor balloting group, including from the mandatory coordination entities, require acknowledgement sent to the commenter and presentation to the Sponsor comment resolution group for consideration. The Sponsor shall send an explanation of the disposition of the mandatory coordination comments to the commenter.

5.4.3.4 Recirculation ballots

Changes may be made in the proposed standard to resolve Do Not Approve votes that are accompanied by comments or for other reasons. All substantive changes made since the last balloted proposed standard shall be identified and recirculated to the Sponsor balloting group. All unresolved Do Not Approve votes with comments shall be recirculated to the Sponsor balloting group. The verbatim text of each comment, the name of the Do Not Approve voter, and a response by the Sponsor conducting the resolution of comments shall be included in the recirculation ballot package. Responses to comments that are not accepted verbatim shall include sufficient detail for Sponsor balloting group members to understand the rationale for rejection of the comment or revision of the change proposed by the commenter.

Further resolution efforts, including additional recirculation ballots, shall be required if Do Not Approve votes with new comments within the scope of the recirculation are submitted.

The Sponsor is not required to conduct a recirculation ballot solely for Do Not Approve (Negative without comment) votes.

5.4.3.5 Completion of the standards balloting process and submittal to RevCom

A minimum of 75% of those voting Approve or Do Not Approve (Negative with comment) must approve the draft in order to submit the ballot result to the IEEE-SA Standards Board. In the event that 30% or more of the returned ballots are Abstentions, the standards balloting process shall be considered invalid.

In the event that a 75% return cannot be obtained, the standards balloting process is considered to have failed and further disposition of the proposed standard shall be the responsibility of the Sponsor.

Once all required recirculations have been completed and 75% approval has been achieved, the IEEE requirements for consensus have been met. Efforts to resolve Do Not Approve votes may continue for a brief period; however, if such resolution is not possible in a timely manner, the Sponsor should forward the submittal to RevCom because the IEEE has an obligation to the majority to review and publish the proposed standard quickly.

Copies of all unresolved Do Not Approve votes, together with the reasons given by the Do Not Approve voters and the responses by the Sponsor, shall be included with the ballot results submitted to RevCom.

The Sponsor shall, if not included in a recirculation package, provide to the Do Not Approve voter and to RevCom an explanation why any comments associated with a Do Not Approve vote were not required to be recirculated. In order for a Do Not Approve vote to be changed to an Approve or Abstain vote, the Sponsor shall obtain and provide to RevCom written confirmation from each voter (by letter, fax, or electronic mail) that indicates concurrence with any change of his or her vote.
Any Do Not Approve vote with comment that RevCom is asked to consider as a Do Not Approve (Negative without comment) shall be explained to RevCom.

Proposed standards receiving a significant number of unresolved Do Not Approve votes should be considered by the Sponsor for trial-use (see 5.7).

5.4.3.7 Comments received as a result of an IEEE Public Review

Upon the opening of the initial Sponsor ballot, an IEEE Public Review shall start and last for 605 days. Any person may purchase the initial ballot draft for information only, and have the ability to submit public review comments on said draft without vote. All public review comments shall be submitted electronically through the IEEE Standards Association public review tools.

If a comment is received as a result of a Public Review process, that comment will be considered addressed by the Sponsor and a disposition response shall be provided returned to the commenter, along with information concerning the right of appeal. If the response indicates that a change is to be made to the draft, the commenter is entitled to receive a copy of the revised draft from the Sponsor upon request.

5.4.5 IEEE 100

IEEE 100, The Authoritative Dictionary of IEEE Standards Terms, is a compendium of terms from both approved IEEE standards and non-IEEE sources. Terms given in the definitions clauses of approved IEEE standards shall be added to IEEE 100.

5.4.6 Comments received from persons who are neither in the balloting group nor an IEEE Public Review commenter

Any person may purchase a ballot draft for information only. Such persons may submit comments on the draft. Comments received before the close of a ballot shall be considered by the Sponsor (see 5.4.3.3) and a response shall be provided to the commenter. If the response indicates that a change is to be made to the draft, the commenter is entitled to receive a copy of the revised draft from the Sponsor upon request.

Comments received after the close of a ballot will be provided to the Sponsor. The Sponsor shall acknowledge the receipt of these late comments to the commenter and take such action as the Sponsor deems appropriate. If the Sponsor considers the comments and provides a response to the commenter indicating that a change is to be made to the draft, the commenter is entitled to receive a copy of the revised draft from the Sponsor upon request.

The SASB unanimously approved the P&P change.

5.6 Standards Review Committee (RevCom)

Ted Burse, RevCom Chair, reported.

6 Standards Coordinating Committee Reports
6.1 SCC Coordinator’s Report

Ted Burse, SCC Coordinator, reported.
There was a motion to accept the submitted reports from SCC21, SCC31, and SCC39. The motion was unanimously approved.

6.2 Scheduled Reports Due in December:
6.2.1 SCC21 – Fuel Cells, Photovoltaics, Dispersed Generation, and Energy Storage (Tom Basso)

Dick DeBlasio, recently retired from the SCC21 Chair role, said a few words in regards to the SCC21 Chair transition to Tom Basso.

6.2.2 SCC31 – Automatic Meter Reading and Energy Management (Lawrence Kotewa)

6.2.3 SCC39 – International Committee on Electromagnetic Safety (Ralf Bodemann)

Ron Petersen, SCC39 Secretary, reported.

7 Liaison Reports
7.1 DOE Report

Dick DeBlasio, DOE Liaison, gave a verbal update.

7.2 NIST Report

Michael Janezic, NIST Liaison, reported.

7.3 IEC Report

Jim Matthews, IEC Vice President and Chairman SMB, reported.

8 Informational Reports
8.1 IEEE-SA President’s Report

Karen Bartleson, IEEE-SA President, reported.

8.2 CAG Report

Glenn Parson, CAG Liaison, reported.

8.3 SASB Chair’s Report

Chair Kulick reported.

There was a motion:
WHEREAS, Richard DeBlasio has served as the chairman of IEEE Standards Coordinating Committee SCC21 since its inception; and
WHEREAS, Richard DeBlasio has provided dedicated support to advancing renewable technologies for more than forty years; and
WHEREAS, Richard DeBlasio has advanced IEEE’s position in the Smart Grid environment, especially in the areas of interoperability and interconnection; and
WHEREAS, Richard DeBlasio has made significant contributions to the advancement of both national and international standards;
NOW, THEREFORE, BE IT RESOLVED, that the IEEE Standards Association Standards Board expresses its thanks to Richard DeBlasio for his tireless devotion to the IEEE Standards Association.

The motion was unanimously approved.

Chair Kulick presented a plaque to Dick DeBlasio and thanked him for his service to the IEEE-SA.

Chair Kulick thanked the 2014 SASB Members for their service.

IEEE-SA President Bartleson thanked Chair Kulick for his service.

9 Old Business
9.1 Approval of Revisions to the 2015 SASB Calendar

- Summary of changes
- Current, posted calendar

Dave Ringle discussed the proposed changes.

There was a motion to approve the updated 2015 calendar. The motion was unanimously approved.

9.2 Patent Policy Changes Proposed by PatCom for SASB Approval Consideration

- Proposed Changes to the IEEE-SA Patent Letter of Assurance (LOA) Form (clean version; redline versus current LOA Form)

This item was taken prior to item 5.4.

David Law reported.

In June, PatCom had approved a motion to forward draft 09 of the proposed changes to the IEEE-SA Patent Letter of Assurance Form to the SASB for approval consideration.

There was a motion to approve draft 09 of the IEEE-SA Patent Letter of Assurance Form contingent upon approval of draft 39 of the IEEE-SA Standards
Board Bylaws (Patent Policy) by the IEEE Board of Directors, effective upon the effective date of such updated Patent Policy. The motion was approved [Yes=17; No=3; Abstain=1].

Voting occurred by paper ballot.

9.3 1680.1/1680.4 Mentor Report

This item was taken after item 6.2.3.

Jon Rosdahl, mentor to 1680.1/1680.4, reported.

C/SAB now has oversight of these groups.

Chair Kulick thanked Jon for his assistance; Jon was released from oversight duties.

10 New Business

10.1 Approval of the 2016 SASB Calendar

Dave Ringle discussed the calendar.

There was a motion to approve the 2016 calendar. The motion was unanimously approved.

10.2 Web Site Migration Project [standards.ieee.org]

Luigi Napoli reported.

11 Upcoming Meetings

11.1 The next meeting of the IEEE-SA Standards Board will be 26 March 2015 in Vienna, Austria.

Moira Patterson reported on the upcoming Vienna series.

12 SASB Resolutions

None

13 Adjournment

There being no further business, the meeting was adjourned at 5:02 p.m.
