Re: IP Letter

Dear Mr. Hayes:

This letter is written in response to your letter requesting that Digital Ocean, Inc. confirm to the IEEE 802 LMSC that should we have patents or pending patent applications that may be infringed by users of the IEEE P802.11 standard, we will provide licenses under them. In that regard:

In the event that proposed standard is adopted and the standard cannot be practiced without the use of material in one or more of Digital Ocean's patents, Digital Ocean agrees, upon written request, that it shall not refuse to grant a nonexclusive license under such patent for use in products conformant to the standard. Such nonexclusive licenses shall include reasonable and nondiscriminatory terms and conditions, including the company's then-current royalty rates.

This letter does not grant any right to the IEEE with respect to Digital Ocean's copyrights, trade or service marks or other intellectual property rights, whether or not they relate to the proposed standard. Any party interested in the license described above may write to Digital Ocean at the address shown at the bottom of this letterhead.

Regards,

Jeffery J. Alholm
Chief Executive Officer
Digital Ocean, Inc.
