## IEEE Standards Activities for Smart Cities

### Overview

In order to meet the increased energy demands of the future, cities throughout the world will need to become smarter. To enable and facilitate this, IEEE has been working for many years on the infrastructure and networking necessary to design, generate, automate, operate, deliver, distribute, support, and connect energy to the cities, homes, and systems that demand it—both now and over the coming years. Major related standards projects are underway in the areas of Smart Grid, Cloud Computing, the Internet of Things (IoT), Intelligent Transportation, and eHealth.

In addition, IEEE is working on standards projects and activities related to:

- IoT
- Smart Energy: Connecting to Smart Grids
- Smart Networking and Connectivity
- Smart Transportation
- Smart Homes and Buildings
- Smart Technologies
