

Table of Contents

Executive Summary	xv
Chapter 1	
Introduction	1
1.1 Purpose and scope.....	1
1.2 CS-SGVP approach	1
1.3 Report organization and use	3
1.3.1 Overview of Chapter 2, “Architectural Concepts”	3
1.3.2 Overview of Chapter 3, “Functional Concepts”	6
1.3.2.1 Introduction	6
1.3.2.2 Overview and structure.....	6
1.3.3 Overview of Chapter 4, “Technological Concepts”	8
Chapter 2	
Architectural Concepts	10
2.1 Introduction	10
2.2 Smart Grid characteristics	10
2.3 Smart Grid architectural concepts	11
2.4 Smart Grid architectural concept visions	13
2.4.1 Supply-side concepts	14
2.4.1.1 Architectural Concept 1: Higher penetration of renewable resources	14
2.4.1.2 Architectural Concept 2: Energy storage and balancing	15
2.4.1.3 Architectural Concept 3: Integrated zones of renewable energy grids	17
2.4.1.4 Architectural Concept 4: A Smart Grid of isolated islands.....	18
2.4.1.5 Outcomes of supply side concepts	19
2.4.2 Demand-side concepts	19
2.4.2.1 Architectural Concept 5: Utility control—demand response	19
2.4.2.2 Architectural Concept 6: Aggregated local energy	21
2.4.2.3 Architectural Concept 7: Self-owned base energy	22
2.4.2.4 Architectural Concept 8: Electric transportation	23
2.4.2.5 Outcomes of demand-side concepts	26
2.4.3 Smart Grid system concepts	26
2.4.3.1 Architectural Concept 9: System architecture—coherent system operations	26
2.4.3.2 Architectural Concept 10: System performance – complex autonomous adaptive systems	28
2.4.3.3 Architectural Concept 11: System and cyber security.....	31
2.4.3.4 Outcomes of Smart Grid system concepts	32
2.5 References	33
Chapter 3	
Functional Concepts	35

3.1	Introduction	35
3.2	Overview and structure.....	35
3.2.1	Systemic functions (see Section 3.4).....	36
3.2.1.1	Cyber security (see Section 3.4.1)	36
3.2.1.2	Systems engineering (see Section 3.4.2).....	36
3.2.2	Enabling functions (see Section 3.5).....	36
3.2.2.1	Communications networks (see Section 3.5.1).....	36
3.2.2.2	Visualization and data management (see Section 3.5.2).....	36
3.2.2.3	Markets and economics (see Section 3.5.3)	36
3.2.3	Performance functions (see Section 3.6).....	37
3.2.3.1	Operations, monitoring and control (see Section 3.6.1).....	37
3.2.3.2	Planning, analysis and simulation (see Section 3.6.2).....	37
3.3	Summary of functional concepts	37
3.4	Systemic functions.....	40
3.4.1	Cyber security subtopic concepts	40
3.4.1.1	Functional Concept 1: Information security	40
3.4.1.2	Functional Concept 2: Control security.....	40
3.4.1.3	Functional Concept 3: Privacy.....	41
3.4.1.4	Functional Concept 4: Supply chain cyber resilience in software and hardware	42
3.4.1.5	Functional Concept 5: Automated intrusion tolerance.....	43
3.4.2	Software systems engineering subtopic concepts	43
3.4.2.1	Functional Concept 6: More dependence on unsupervised autonomy	43
3.4.2.2	Functional Concept 7: Social nodes	44
3.4.2.3	Functional Concept 8: Smart Grid autonomous validation	45
3.5	Enabling functions	46
3.5.1	Communications networks subtopic concepts	46
3.5.1.1	Functional Concept 9: Proliferation of intelligent devices and nodes	46
3.5.1.2	Functional Concept 10: Secure converged communications	47
3.5.1.3	Functional Concept 11: Smart Grid hardware and software refresh	48
3.5.2	Visualization and data management subtopic concepts	49
3.5.2.1	Functional Concept 12: State awareness.....	49
3.5.2.2	Functional Concept 13: System failure awareness, emergency response and system restoration	50
3.5.3	Markets and economics subtopic concepts	51
3.5.3.1	Functional Concept 14: Wholesale electric power market policy, operation and design	51
3.5.3.2	Functional Concept 15: Emergent dynamic demand side markets	53
3.6	Performance functions.....	54
3.6.1	Operations, monitoring, and control subtopic concepts	54
3.6.1.1	Functional Concept 16: Bulk system transmission dynamic operations	54
3.6.1.2	Functional Concept 17: Operations congestion detection.....	55
3.6.1.3	Functional Concept 18: Power flow forecasting in distribution networks.....	55
3.6.1.4	Functional Concept 19: Direct load control events	56
3.6.1.5	Functional Concept 20: Island-to-island stable power flow control	56
3.6.1.6	Functional Concept 21: Automated grid load flow coordination	57
3.6.1.7	Functional Concept 22: Advanced process coordination of industrial manufacturing	58

3.6.1.8	Functional Concept 23: Commercial and industrial building coordination	59
3.6.2	Planning, analysis and simulation subtopic concepts	59
3.6.2.1	Functional Concept 24: Bulk system transmission planning	59
3.6.2.2	Functional Concept 25: Asset management and maintenance	60
3.6.2.3	Functional Concept 26: Resilient systems	61
3.6.2.4	Functional Concept 27: Advanced command, control, and automated functions	62
3.7	References	64

Chapter 4

Technological Concepts	68	
4.1	Introduction	68
4.2	Overview and structure	68
4.3	Distributed systems architecture	68
4.3.1	Technological Concept 1: Self-integrating systems and standards	69
4.3.1.1	Background	70
4.3.1.2	Future vision	70
4.3.1.3	Computer science keywords	71
4.3.2	Technological Concept 2: Distributed multiple-agent architecture	71
4.3.2.1	Background	71
4.3.2.2	Future vision	72
4.3.2.3	Computer science keywords	73
4.3.3	Technological Concept 3: Virtual computing architecture	73
4.3.3.1	Background	74
4.3.3.2	Future vision	74
4.3.3.3	Computer science keywords	75
4.3.4	Technological Concept 4: Messaging-oriented middleware	75
4.3.4.1	Background	75
4.3.4.2	Future vision	76
4.3.4.3	Computer science keywords	76
4.4	Computer applications	77
4.4.1	Technological Concept 5: Market-Inspired (transactive) control	77
4.4.1.1	Background	77
4.4.1.2	Future vision	77
4.4.1.3	Computer science keywords	78
4.4.2	Technological Concept 6: Monitoring and control/modeling and simulation tools	78
4.4.2.1	Background	78
4.4.2.2	Future vision	79
4.4.2.3	Computer science keywords	79
4.4.3	Technological Concept 7: Signal processing for control, protection and performance qualification/performance monitoring	80
4.4.3.1	Background	80
4.4.3.2	Future vision	80
4.4.3.3	Computer science keywords	81
4.4.4	Technological Concept 8: State estimation analysis algorithms	81
4.4.4.1	Background	81
4.4.4.2	Future vision	81
4.4.4.3	Computer science keywords	82
4.4.5	Technological Concept 9: Contingency, preventive and corrective control analysis	82
4.4.5.1	Background	83

4.4.5.2	Future vision	83
4.4.5.3	Computer science keywords	84
4.4.6	Technological Concept 10: Stochastic analysis for system operations, planning, forecasting.....	84
4.4.6.1	Background.....	84
4.4.6.2	Future vision	85
4.4.6.3	Computer science keywords	85
4.4.7	Technological Concept 11: Prognostics and asset management.....	85
4.4.7.1	Background.....	86
4.4.7.2	Future vision	86
4.4.7.3	Computer science keywords	86
4.5	Information science	86
4.5.1	Technological Concept 12: Visualization	86
4.5.1.1	Background.....	87
4.5.1.2	Future vision	87
4.5.1.3	Computer science keywords	88
4.5.2	Technological Concept 13: Artificial Intelligence, data analytics, fast mathematics, and high-performance computing.....	89
4.5.2.1	Background.....	89
4.5.2.2	Future vision	89
4.5.2.3	Computer science keywords	90
4.5.3	Technological Concept 14: Internet and real-time systems.....	90
4.5.3.1	Background.....	91
4.5.3.2	Future vision	91
4.5.3.3	Computer science keywords	92
4.5.4	Technological Concept 15: Software verification and validation.....	92
4.5.4.1	Background.....	93
4.5.4.2	Future vision	93
4.5.4.3	Computer science keywords	93
4.6	Cyber security.....	94
4.6.1	Technological Concept 16: Trusted component validation	94
4.6.1.1	Background.....	94
4.6.1.2	Future vision	94
4.6.1.3	Computer science keywords	95
4.6.2	Technological Concept 17: Portable identity—bidirectional authentication support	95
4.6.2.1	Background.....	95
4.6.2.2	Future vision	95
4.6.2.3	Computer science keywords	96
4.6.3	Technological Concept 18: Hierarchical sense making	96
4.6.3.1	Background.....	96
4.6.3.2	Future vision	97
4.6.3.3	Computer science keywords	98
4.6.4	Technological Concept 19: Massive parallel pattern detection.....	98
4.6.4.1	Background.....	98
4.6.4.2	Future vision	98
4.6.4.3	Computer science keywords	99
4.6.5	Technological Concept 20: Patterns for implementing agile self-organizing security	100
4.6.5.1	Background.....	100
4.6.5.2	Future vision	100
4.6.5.3	Computer science keywords	101
4.6.6	Technological Concept 21: Information security technology	101
4.6.6.1	Background.....	101

4.6.6.2	Future vision	101
4.6.6.3	Computer science keywords	102
4.6.7	Technological Concept 22: Communications security	102
4.6.7.1	Background.....	103
4.6.7.2	Future vision	104
4.6.7.3	Computer science keywords	105
4.7	References	106

Annex A

Mappings between Functional Concepts and Technological Concepts.....	109
