Tentative Interim Amendment 2002-1

to the

National Electrical Safety Code

ANSI C2-2002

9 May 2001

Rule 123C: Delete the last sentence and add the following underlined sentence.

Electric equipment or conductors normally operating at more than 600 V between conductors, on or about which work is occasionally done while isolated from a source of electric energy by disconnecting or isolating switches only, shall be provided with some means for grounding, such as switches, connectors, or a readily accessible means for connecting a portable grounding conductor. When necessary, grounding may be omitted on conductors normally operating at 25 kV or less and not influenced by higher voltage conductors, where visible openings in the source of supply are available, and are properly tagged in the open position. See Part 4 of this code.

Rule 173C: Delete entire rule.
