

IEEE Standard for Use by Emergency Management Centers - IEEE 1512 Series (Bundle)

The 1512 series for use by emergency management centers goal is to support efficient communication for the real-time, interagency management of transportation-related events. Those events include incidents, emergencies, accidents, planned roadway closures, special events, and disasters caused by humans or natural events. Those events include any such event that impacts transportation systems or that causes a report to be received by an emergency management system, whether or not the event actually affects a transportation system and whether or not a response is required
