5.2 Update on Working Group P&P Due - Chair Reilly

Chair Reilly provided an update on the current status of Working Group P&P that have been requested following the acceptance of Standards Committee P&P and mentioned that follow up will continue as new Standards Committees get added to this running list. It was noted during the P&P review that the motion passed at the November meeting series [to inactivate Standards Committees with active projects whose Working Group P&P were requested prior to 1 March 2019 if they have not submitted Working Group P&P by 29 February 2020] was no longer needed because the one remaining Standards Committee in this category submitted Working Group P&P for review.

5.3 2019 Baselines Ad Hoc Update - Chair Reilly

Chair Reilly thanked the members of the 2019 Baselines ad hoc, and provided an update on the progress made during the year. Identified change items have been noted for the Standards Committee, SCC Type 2, and Working Group individual baselines. Revisions for Working Group entity and Working Group simplified baselines are nearing completion for identified change items. Changes related to Open Source will be incorporated when higher level governance documents are available. She mentioned that the ad hoc will continue into 2020, and noted that once the baseline updates are approved, the review checklists and instructions documents will need to be updated, too.

5.4 myProject Updates - Chair Reilly

Chair Reilly provided an update on the progress of the ad hoc for myProject User Acceptance Testing. Volunteer testing took place during the first two weeks in December. Approximately 60 items were identified during this testing, with some being critical and others being preferences for features. This list has been prioritized and after the critical fixes are completed, there may be a need to re-test the system. Barring anything unforeseen,
the expected cutover to the updated myProject is still on or close to 27 January 2020. The blackout period for balloting has begun, and there will be a time closer to the cutover when uploads of P&P and checklists also need to wait.

6. NEW BUSINESS

6.1.1 IEEE Industry Applications Society Metal Industry Committee Standards Development Subcommittee (IAS/METC)

This was discussed after agenda item 4.1.3.

Motion: Recognize the Industry Applications Society Metal Industry Committee Standards Development Subcommittee, to be abbreviated as IAS/METC, as an official Standards Committee, in accordance with IEEE SASB Bylaws 5.2.2. Upon vote, the motion passed.
