IoT Ecosystem Security
Industry Connections Activity Initiation Document (ICAID)

Version: 2.0, 1 September 2022

IC20-011-02 Approved by the CAG 16 December 2022

Instructions

- Instructions on how to fill out this form are shown in red. Please leave the instructions in the final document and simply add the requested information where indicated.
- Spell out each acronym the first time it is used. For example, “United Nations (UN).”
- Shaded Text indicates a placeholder that should be replaced with information specific to this ICAID, and the shading removed.
- Completed forms, in Word format, or any questions should be sent to the IEEE Standards Association (IEEE SA) Industry Connections Committee (ICCom) Administrator at the following address: industryconnections@ieee.org.
- The version number above, along with the date, may be used by the submitter to distinguish successive updates of this document. A separate, unique Industry Connections (IC) Activity Number will be assigned when the document is submitted to the ICCom Administrator.

1. Contact
Provide the name and contact information of the primary contact person for this IC activity. Affiliation is any entity that provides the person financial or other substantive support, for which the person may feel an obligation. If necessary, a second/alternate contact person’s information may also be provided.

Name: Ashish Mahajan
Email Address: ashish@iotsec.net.au
Employer: IotSec
Affiliation: IotSec.net.au

IEEE collects personal data on this form, which is made publicly available, to allow communication by materially interested parties and with Activity Oversight Committee and Activity officers who are responsible for IEEE work items.

2. Participation and Voting Model
Specify whether this activity will be entity-based (participants are entities, which may have multiple representatives, one-entity-one-vote), or individual-based (participants represent themselves, one-person-one-vote).

Entity Based
3. **Purpose**

3.1 **Motivation and Goal**

Briefly explain the context and motivation for starting this IC activity, and the overall purpose or goal to be accomplished.

By 2025, there will be more than 21 billion IoT devices which means, every sector including Healthcare, Smart Energy, Industrial IoT, Smart Cities and every individual and household will have IoT dependency for improved efficiency, process optimisation or ease. With the IoT growing bigger and ever more complex, the question arises for companies of how to keep pace and without a doubt, technology enabling IoT will become the prime and easy target for Cybercriminals. The motivation behind this IC is to raise awareness at consumer and manufacturers sector and work with regulators to promote secure practices in the IoT ecosystem with a view of IoT as an inextricably linked ecosystem comprised of people, processes, and technology.

3.2 **Related Work**

Provide a brief comparison of this activity to existing, related efforts or standards of which you are aware (industry associations, consortia, standardization activities, etc.).

One of the objectives as part of this IC program is also to understand some of the security work that has been done with some of our standards focused around IoT; IEEE P2413-2019 had a focus on "quadruple trust" and hence we'd like to make sure when we are looking into this problem, we are having considerations of work already happening. We might also discover few other IEEE standards as we are looking into some established work. This work is looking at a "top down" approach as we are looking into the IoT Security Framework but this needs to have into consideration some of the bottom up security work happening in a distributed fashion today.

3.3 **Previously Published Material**

Provide a list of any known previously published material intended for inclusion in the proposed deliverables of this activity.

N/A

3.4 **Potential Markets Served**

Indicate the main beneficiaries of this work, and what the potential impact might be.

This will serve the global market focusing on Critical infrastructure, Consumer IoT, Medical IoT, and Consumer.
3.5 How will the activity benefit the IEEE, society, or humanity?
Describe how this activity will benefit the IEEE, society, or humanity.

Global standardization of IoT is the only solution to reduce the overall security risk, ensure interoperability and meet technical, safety, regulatory, societal and market needs. With global reach and dedication to advancing technology for the benefit of humanity, identifying necessary new standards activities (or enhancements to existing standards) for IoT landscape under IEEE’s guidelines will have a positive influence on global society.

4. **Estimated Timeframe**
Indicate approximately how long you expect this activity to operate to achieve its proposed results (e.g., time to completion of all deliverables).

**Expected Completion Date:** 09/2024

IC activities are chartered for two years at a time. Activities are eligible for extension upon request and review by ICCom and the responsible committee of the IEEE SA Board of Governors. Should an extension be required, please notify the ICCom Administrator prior to the two-year mark.

5. **Proposed Deliverables**
Outline the anticipated deliverables and output from this IC activity, such as documents (e.g., white papers, reports), proposals for standards, conferences and workshops, databases, computer code, etc., and indicate the expected timeframe for each.

1. Draft white Paper and report on IoT Security Framework which identifies current architectures and the need to address secure practices in the IoT ecosystem; This paper will also include identification of other communities (working groups) within IEEE SA who are focused on IoT and other ecosystem players addressing security issues as part of the overall landscape (Q3 2023)
2. Gap analysis w.r.t. existing standards (June 2023)
3. Develop recommendations for best practice standards/guidelines which will be proposed as new projects to the IEEE SA (Sep 2023); the proposal will be planned to be submitted to IEEE SA as and when they are identified
4. We have started webinars and completed 2 webinars in the first 2 quarters of 2022. The plan is to have 2 more for 2022 (at least) and 1 webinar for the first quarter of 2023, a follow-up workshop in 2023
5. Final version of the white paper and report (Dec 2023)

5.1 **Open Source Software Development**
*Indicate whether this IC Activity will develop or incorporate open source software in the deliverables. All contributions of open source software for use in Industry Connections activities shall be accompanied by an approved IEEE Contributor License Agreement (CLA) appropriate for the open source license under which the Work Product will be made available. CLAs, once accepted, are irrevocable. Industry Connections Activities shall*
comply with the IEEE SA open source policies and procedures and use the IEEE SA open source platform for development of open source software. Information on IEEE SA Open can be found at https://saopen.ieee.org/.

Will the activity develop or incorporate open source software (either normatively or informatively) in the deliverables?  No

6. Funding Requirements
Outline any contracted services or other expenses that are currently anticipated, beyond the basic support services provided to all IC activities. Indicate how those funds are expected to be obtained (e.g., through participant fees, sponsorships, government, or other grants, etc.). Activities needing substantial funding may require additional reviews and approvals beyond ICCom.

No additional funding requests are anticipated beyond the basic IC support services provided by IEEE

7. Management and Procedures

7.1 Activity Oversight Committee
Indicate whether an IEEE Standards Committee or Standards Development Working Group has agreed to oversee this activity and its procedures.

Has an IEEE Standards Committee or Standards Development Working Group agreed to oversee this activity? No

If yes, indicate the IEEE committee’s name and its chair’s contact information.

IEEE Committee Name: Committee Name
Chair’s Name: Full Name
Chair’s Email Address: who@where

Additional IEEE committee information, if any. Please indicate if you are including a letter of support from the IEEE Committee that will oversee this activity.

IEEE collects personal data on this form, which is made publicly available, to allow communication by materially interested parties and with Activity Oversight Committee and Activity officers who are responsible for IEEE work items.

7.2 Activity Management
If no Activity Oversight Committee has been identified in 7.1 above, indicate how this activity will manage itself on a day-to-day basis (e.g., executive committee, officers, etc.).

The activity will be managed by the leadership of the working group from IoTSec
The group would establish a chair, vice-chair and other officers as needed; officers will be elected to manage the day-to-day operations of the group.

**7.3 Procedures**

Indicate what documented procedures will be used to guide the operations of this activity; either (a) modified baseline *Industry Connections Activity Policies and Procedures (entity, individual)*, (b) *Abridged Industry Connections Activity Policies and Procedures (entity, individual)*, (c) Standards Committee policies and procedures accepted by the IEEE SA Standards Board, or (d) Working Group policies and procedures accepted by the Working Group’s Standards Committee. If option (a) is chosen, then ICCom review and approval of the P&P is required. If option (c) or (d) is chosen, then ICCom approval of the use of the P&P is required.

“Industry Connections Activity Modified Baseline Policies and Procedures”.

**8. Participants**

**8.1 Stakeholder Communities**

Indicate the stakeholder communities (the types of companies or other entities, or the different groups of individuals) that are expected to be interested in this IC activity and will be invited to participate.

Industrial IoT Industry (Device Manufacturers, System Integrators), Consumer IoT ecosystem, Regulatory Bodies, Healthcare providers, Entities focused on critical infrastructure.

**8.2 Expected Number of Participants**

Indicate the approximate number of entities (if entity-based) or individuals (if individual-based) expected to be actively involved in this activity.

5-10 entities

**8.3 Initial Participants**

Provide a few of the entities or individuals that will be participating from the outset. It is recommended there be at least three initial participants for an entity-based activity, or five initial participants (each with a different affiliation) for an individual-based activity.

Use the following table for an entity-based activity:

<table>
<thead>
<tr>
<th>Entity Name</th>
<th>Primary Contact Name</th>
<th>Additional Representatives</th>
</tr>
</thead>
<tbody>
<tr>
<td>IoTSec</td>
<td>Ashish Mahajan</td>
<td>Lani Refiti, Jacob oberman</td>
</tr>
<tr>
<td>GeoWan</td>
<td>Tim Cara</td>
<td></td>
</tr>
<tr>
<td>Griffith Univeristy</td>
<td>Prof Ernest Foo</td>
<td></td>
</tr>
<tr>
<td>Azcende</td>
<td>Alok Patel</td>
<td></td>
</tr>
<tr>
<td>xQLD university</td>
<td>Dr. Biplop Ray</td>
<td></td>
</tr>
<tr>
<td>RIOT Solutions</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
8.4 Activity Supporter/Partner
Indicate whether an IEEE committee (including IEEE Societies and Technical Councils), other than the Oversight Committee, has agreed to participate or support this activity. Support may include, but is not limited to, financial support, marketing support and other ways to help the Activity complete its deliverables.

Has an IEEE Committee, other than the Oversight Committee, agreed to support this activity? No

If yes, indicate the IEEE committee’s name and its chair’s contact information.

IEEE Committee Name: Committee Name
Chair’s Name: Full Name
Chair’s Email Address: who@where

Please indicate if you are including a letter of support from the IEEE Committee.
